LED Wall Packs & Floodlights

ELCO Lighting
The Best Choice in Lighting

Introducing ELCO's LED Wall Packs

ELCO Lighting's LED Wall Packs, Photocell Wall Mounts, Canopy Lighting and Floodlights are designed to enhance security and safety for building exteriors, parking garages, walkways and other outdoor locations. Constructed of heavy-duty materials and utilizing the most energy efficient LED platforms, ELCO LED Wall Packs will deliver years of dependable service while maintaining their rugged good looks.

Medium Wall Pack

Die-cast aluminum housing with dark bronze powder coated finish.

Medium LED Wall Packs feature traditional design with medium lumen output and energy efficient performance. Heavy-duty, die-cast aluminum construction ensures long lasting functionality even under harsh weather conditions. High quality polycarbonate lens guards against ultra-violet damage and environmental contamination. DLC qualified. For applications requiring 4,450 to 6,800 lumens.

Accessories

for Wall Packs

EWPMSh (Medium) - EWPLSH (Large)

Wall Pack Shield

Cut-off shield is used on outdoor wall packs to direct light downward, reduce light pollution and reduce glare.

EWPPHBU (120/277V) - EWPPHB1 (120V)

Button Photocell

Fixed-position photocell allows the luminaire to automatically be lit in the absence of daylight. Works with 120/277V or 120V. For automatic dusk to dawn lighting.

EWPPHSU (120/277V)

Swivel Photocell

Swivel photocell allows the luminaire to be lit in the absence of daylight with directional specification. Works with 120/277V. For automatic dusk to dawn lighting.

EWMSU (120/277V)

Motion Detector

Motion Detector allows the luminaire to be lit when there is an absence of daylight and an area is occupied. Works with 120/277V.

EWMSDU (120/277V)

Dimmable Motion Detector

Dimmable motion detector switches luminaire to preset dim levels in the absence of daylight and illuminates fully when an area is occupied. The luminaire stays lit for a set period of time. Keeps luminaire within the T24 regulations while keeping an area lit constantly in the absence of daylight. Works with 120/277V. To be used with dimmable luminaires only.

California Title 24 outdoor lighting code require outdoor wall mounted luminaires rated greater than 30 watts and mounted 24 feet high or less to be installed with a motion detector to only illuminate an area when it is occupied (see ELCO Motion Detector EWMS1). To keep an area continuously lit in the absence of daylight and occupants, the lighting must be dimmed from 10 to 60 percent during this time (see ELCO Dimmable Motion Detector EWMSD1). If an outdoor luminaire rated greater than 30 watts is mounted above 24 feet, only a photocell is required to automatically light the area only in the absence of daylight (see ELCO Photocells EWPPHBU or EWPPHSU).

Adjustable Wall Pack with Photocell

Die-cast aluminum housing with dark bronze powder coated finish and adjustable head.

Adjustable LED Wall Packs feature full cut-off design and a tilt mechanism to aim light precisely, minimizing glare, backlight and light spillover. These durable, energy-saving fixtures are perfect for lighting outdoor walkways, landscapes, parking areas, schools, hospitals, hotels, offices, and building exteriors. DLC qualified. For applications requiring 2000, 3000 or 4500 lumens.

Wall Mount with Photocell

Die-cast aluminum housing with dark bronze powder coated finish.

LED Wall Mount Fixture is designed for safety and security in residential, stairway, storage and perimeter lighting applications. Features a photocell and a powerful LED array for maximum energy efficiency. Die-cast aluminum construction, powder coat finish and a polycarbonate lens combine to make this a beautiful yet durable lighting fixture.

Medium Floodlight

Die-cast aluminum housing with dark bronze powder coated finish.

Medium LED floodlights are ideal for illuminating building facades, wall washing building exteriors, sign lighting, landscape lighting and improving building security. Heavy-duty die-cast aluminum construction and high quality components ensure that Elco floodlights will provide years of solid performance in almost any weather condition. Available in medium and super-wide beam angles to accommodate any outdoor floodlight applications.

EFLWLG (Large)

Wireguard

Wireguard is used on outdoor floodlights to help prevent damage.

EWPPHBU (120/277V)

EWPPH (120V)

Button Photocell

Fixed-position photocell allows the luminaire to automatically be lit in the absence of daylight. Works with 120/277V or 120V. For automatic dusk to dawn lighting. For large floodlights only.

EFLLSF

Slipfitter Adapter

Swivel slipfitter enables floodlights fixtures to be secured on 2 3/8" O.D. tenons. For large floodlights only.

EWPPHSU (120/277V)

Swivel Photocell

Swivel photocell allows the luminaire to be lit in the absence of daylight with directional specification. Works with 120/277V. For automatic dusk to dawn lighting. For large floodlights only.

EFLLTB

Trunnion Bracket

Adjustable trunnion bracket enables floodlights to be secured on buildings, walls, and flat surfaces. For large floodlights only.

EWMSDU (120/277V)

Dimmable Motion Detector

Dimmable motion detector switches luminaire to preset dim levels in the absence of daylight and illuminates fully when an area is occupied. The luminaire stays lit for a set period of time. Keeps luminaire within the T24 regulations while keeping an area lit constantly in the absence of daylight. Works with 120/277V. For automatic dusk to dawn lighting. For large dimmable floodlights only.

EFLMKW

Knuckle

1/2" knuckle enables floodlights to be mounted on standard junction boxes and pipes. For medium floodlights only.

EWMSU (120/277V)

Motion Detector

Motion Detector allows the luminaire to be lit when there is an absence of daylight and an area is occupied. Works with 120/277V. For large floodlights only.

Wall Mounted

California Title 24 outdoor lighting code require outdoor wall mounted luminaires rated greater than 30 watts and mounted 24 feet high or less to be installed with a motion detector to only illuminate an area when it is occupied (see ELCO Motion Detector EWMS1). To keep an area continuously lit in the absence of daylight and occupants, the lighting must be dimmed from 10 to 60 percent during this time (see ELCO Dimmable Motion Detector EWMSD1). If an outdoor luminaire rated greater than 30 watts is mounted above 24 feet, only a photocell is required to automatically light the area only in the absence of daylight (see ELCO Photocells EWPPHBU or EWPPHSU).

Pole Mounted

California Title 24 outdoor lighting code require non-residential outdoor pole mounted luminaires rated greater than 75 watts and mounted 24 feet or less to be installed with a motion detector to only illuminate an area when it is occupied (see ELCO Motion Detector EWMS1). To keep an area continuously lit in the absence of daylight and occupants the lighting must be dimmed from 10 to 60 percent during this time (see ELCO Dimmable Motion Detector EWMSD1). If an outdoor luminaire rated greater than 75 watts is mounted above 24 feet only a photocell is required to automatically light the area only in the absence of daylight (see ELCO Photocells EWPPHBU or EWPPHSU).
