## Installation Instructions Bait™ LED Die-Cast Aluminum Pendants

1. Before beginning the installations, carefully unpack and identify all parts.

2. Turn off power while installing or servicing this fixture.

### PREPARATION FOR WIRING :

1. Thread cord of pendant into knob, canopy, nipple nut, mounting strap and strain relief. ( Fig 1.2.3 ).
2. Measure the desired length of " A " from the top of shade to strain relief by adjusting the cord on strain relief. ( Fig 1 ).
3. Leave additional length of 6" from B to C and cut off the unnecessary cord.

**NOTE : If you do not want to cut any cord, just leave extra 6" near the end of cord and go directly to wiring.**

4. Within the length of 1-1/2" D on the cord near the end, make a mark E, use knife to slightly cut the surface of the cord. ( Fig 4 ).

**CAUTION : Cutting too deep in the cord may cut three wires inside.**

5. Peel off the length of cord outside D and leave 3 wires inside. ( Fig 5 ).
6. Peel off the length of 3 wires 3/8" near the end and expose the cooper for wiring. ( Fig 6 )

### WIRING :

1. Mount mounting strap securely to junction box with 2 mounting screws through slot in mounting strap. ( Fig 7 ).
2. Make wire connections with wire connectors : ( Fig 7 )
  - Connect Clear wire with **black stripe** ( or Black wire ) from the fixture to Black supply wire with a wire connector.
  - Connect Clear wire ( or White wire ) from the fixture to White supply wire with a wire connector.
  - Fasten Clear wire with light **green stripe** ( or Green Ground wire ) from the fixture and Green Ground supply wire and Ground canopy wire to Green Ground screw on mounting strap.
3. Tuck the wires carefully inside the junction box.
4. Pull the cord down slightly until the strain relief touches the strap. Attach the canopy to the mounting strap by rotation the knob until it is tight.
5. Install the recommended bulb.
6. Turn on the power at fuse or circuit box.
